It's been a while and SwiftUI is out and it's quite exciting and lovely, why you ask

1. No pain of dealing to merge those crazy conflicts in Storyboards.
2. No IBOutlet and IBActions to deal with.
3. Declarative syntax is just easy to learn.
4. No implementation of those delegate methods to change the state of UI components.

What’s a stack?

Codecat15

Stack means grouping of objects
