

Codecat15

List and NavigationView

Topics to be covered today

Codecat15

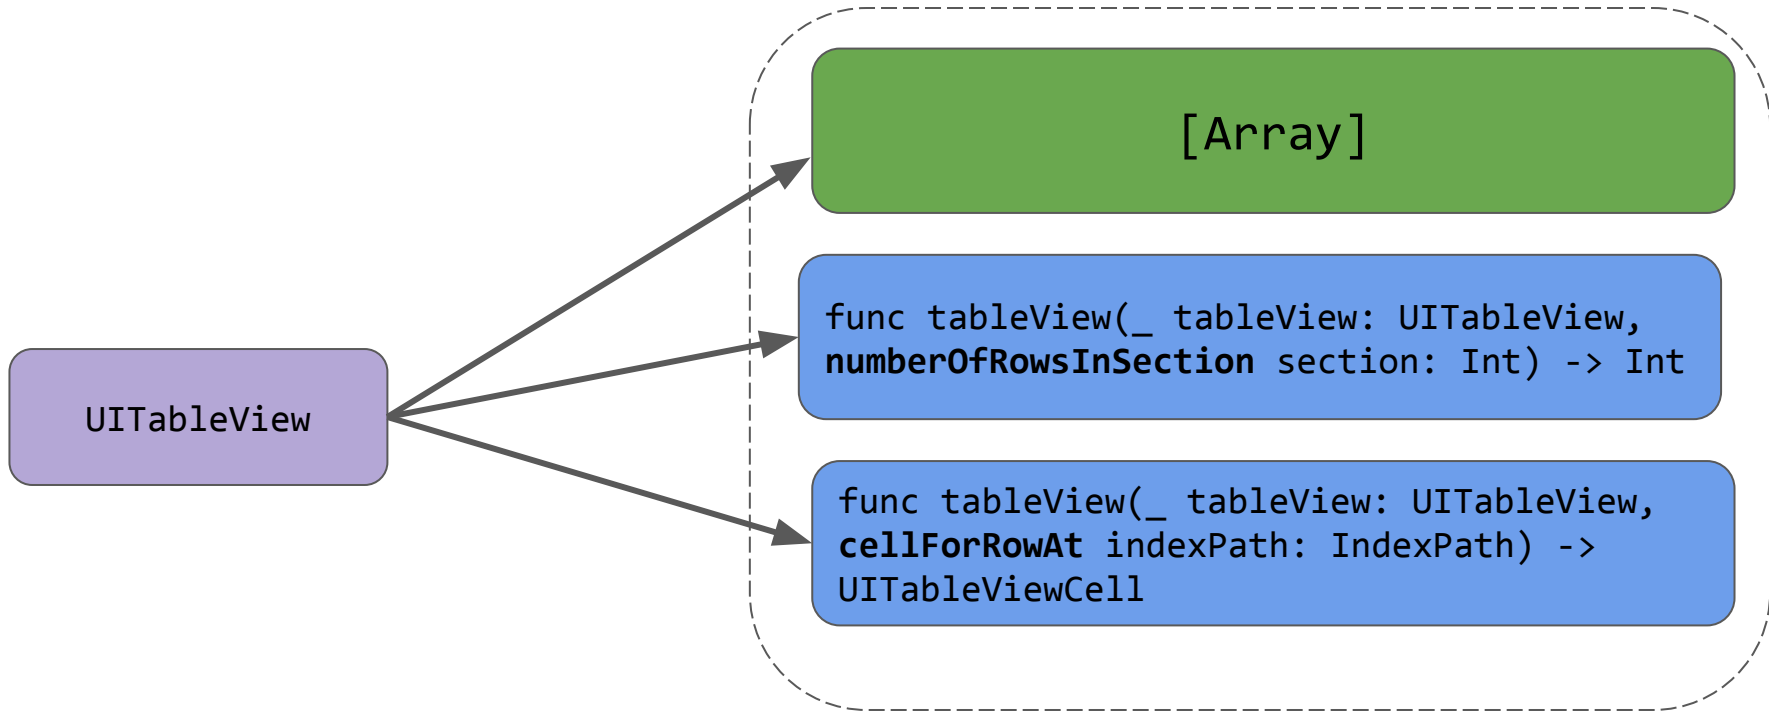

1. Walkthrough of creating a table view with UIKit.
2. Demo of creating a simple list in SwiftUI.
3. Identifiable protocol

Codecat15

1. Walkthrough of creating a table with UIKit

UIKit way of creating a table view

Codecat15

2.

Demo: Creating a simple list in SwiftUI

Codecat15

3. Identifiable protocol

Codecat15

Identifiable protocol

1.

Ravi

Ravi

Ravi

2.

Ravi Surname

Ravi Surname

Ravi D

3.

Roll no 10

Roll no 15

Roll no 21

Demo time

Codecat15

Navigation link

NavigationLink => LandmarkDetailView

Table cell

Codecat15

What we understood today

1. Creating a simple list.
2. We don't need Identifiable protocol for creating list
3. The id in ForEach should be a unique id else list will not behave accordingly
4. Implementing swipe to delete functionality
5. Creating a list with multiple section
6. Navigation view.
7. Navigation link.
